Empowering Traders: Innovate, Stake, Learn and Profit with \$DTL

1 Introducing \$DTL

DexTradingLive is set to transform the decentralized trading environment with the \$DTL token ecosystem, elevating experiences on the native Defichain DEX.

Our platform uniquely integrates the \$DTL token and the exclusive \$DTL Privilege Club membership, creating a sophisticated and rewarding ecosystem for traders and investors alike. \$DTL is designed to bridge the gap between native and EVM-based tokens, offering diverse trading, staking, and portfolio building opportunities.

This makes \$DTL an essential tool for maximizing the advantages of the Defichain DeFi capabilities, catering to both novice and experienced participants in the cryptocurrency market.

As we introduce cutting-edge functionalities, \$DTL is poised to set new standards in accessibility, profitability, and security in decentralized trading.

1.1 What is DexTradingLive?

DexTradingLive started in April 2023 with the launch of our website <https://www.dex-trading.live> giving investors on the DefiChain DEX the tools to educate themselves about trading on the native DEX.

We have launched the DexTradingMasters on 15.5.2023 to incentivize traders and challenge others in a competitive environment. The DexTradingMasters has been instrumental in inspiring more users to explore the DEX and uncover the exceptional opportunities it offers. Our DefiChain dToken system is ahead of the curve, embracing tokenization and #RWA before they hit the mainstream.

We see ourselves as the “Dex Keepers” looking after the dToken system and Tokenomics to keep it up to date and attractive. The dTokens on the native Dex are at the core of DefiChain bringing tokenized assets (dTokens) in a decentralized environment, making them tradable securely, in fractions and 24/7/365.

We are offering free workshops in German and English to anyone who wants to learn how to trade successfully on the Dex. To facilitate that even further we have also taken over <https://www.defichain.trade> to not only keep this great tool alive for the community but to improve it step by step giving traders more tools to analyze the Dex and benefit from it.

DexTradingLive consists of a team of 6 members who are dedicating their free time and resources to this project.

1.2 Our Brand philosophy

Our brand design uses gold and black colors to connect with our user dreams and goals. Gold stands for success and the top achievements every trader hopes for, while black represents steadiness and trust, important qualities for any trading platform.

These colors do more than just define the look of our brand; they echo our commitment to providing a safe, transparent, and innovative platform.

By using these colors in our \$DTL Privilege Club, we aim to inspire confidence and foster a strong community feel, helping members at all levels—from beginners to seasoned traders—reach their trading goals in the decentralized finance world.

1.3 Our Vision:

We want to enable more people to use and profit from the unique DefiChain DEX by opening up new ways to participate and trade #RWA from the EVM layer. We aim to incentivise people to participate in our core business - to polish the raw diamond DEX and to be the leading platform for Native Dex Trading and Education.

To broaden our reach and enhance the trading experience on the native Dex — making it faster, more professional, accessible, and rewarding — we are launching our new \$DTL Privilege Club token which will fuel our trading ecosystem and offer many unique opportunities to investors. \$DTL can be traded, staked and used to redeem benefits related to trading on the DEX.

1.4 Why are we launching on the Crypto Factor platform?

\$DTL will be the first major project to utilize Crypto Factor capabilities. This partnership showcases \$DTL strong use case and pioneering role in bridging the native/EVM divide and combines it with the effortless Crypto Factor templates for enhanced security, staking and asset backing. This sets \$DTL apart and appeals to a wide range of traders and investors.

We've chosen to partner with Crypto Factor for our \$DTL Token launch due to their robust, decentralized software deployment capabilities on the OpenDApps platform. Their streamlined templates simplify complex processes like tokenomics setup and staking, freeing up significant resources within our team. This strategic allocation allows us to concentrate on enhancing the \$DTL Privilege Club, ensuring we provide maximum value and innovation to our members.

2 Token Utility and Use Cases

2.1 \$DTL Token Overview

\$DTL tokens are non-inflationary, meaning their supply will not increase over time. These tokens can be actively traded and staked within our ecosystem. Our buyback & burn policy is designed to continually reduce the total supply of \$DTL tokens, enhancing their scarcity and potential value.

2.2 Access and Transactional Utility

\$DTL serves as the primary currency within our ecosystem, necessary for accessing every product or service we offer. Transaction fees from various services such as the DexTradingMasters (DTM), specialized workshops, our proprietary Dex-Native Trading Wallet, and activities involving our trading bots are all denominated in \$DTL. These fees constitute real yield rewards for \$DTL holders.

2.3 \$DTL Privilege Club Benefits

Membership in the \$DTL Privilege Club offers numerous advantages including high Staking APRs, exclusive Wallet & Bot access, complimentary or reduced fees for DTM participation, access to private workshops, and a dedicated Ocean API endpoint, among others.

2.4 Advanced Trading Tools

\$DTL unlocks access to our state-of-the-art Dex-Native Trading Wallet, designed for superior trading performance. Features include instant execution, multiple transactions per block and one-click un-looping. This facilitates sophisticated risk management strategies such as stop-loss and take-profit settings, giving our traders a competitive edge.

2.5 Rent a Bot Service

Discover our pioneering Rent a Bot service, a fresh innovation within the Defichain ecosystem. This service empowers users to profit by leveraging strategies from top professional Dex Traders.

Utilizing \$DTL tokens for this service not only opens new profit avenues but also boosts the overall staking APR as transaction fees are reinvested back into the network, enhancing \$DTL's value and utility.

2.6 Staking Rewards and Automation

Staking \$DTL offers holders not only a high APR, which includes trading fees from THE Wallet, DexTradingMasters activities, our Smart Copy Trading Bot and Rent a Bot service, but also the convenience of automated reward transfers. This significantly enhances the attractiveness of the DTL ecosystem.

Stakers can choose from 3, 6, or 12-month sealed vaults, each providing progressively higher APRs. Additionally, our unique multiplier system accelerates the achievement of higher \$DTL Privilege Club tier ranks the longer you stake. This dual benefit structure ensures that long-term stakers are rewarded generously, both in terms of returns and elevate membership status.

2.7 Revenue and Distribution Mechanism

A significant portion of our revenue stream is managed autonomously through Crypto Factor advanced revenue engine using smart contracts. This system efficiently allocates funds between staking rewards, asset backing, operational expenses, and team remunerations. A portion of collected fees is systematically burned to further reduce token supply and increase its rarity.

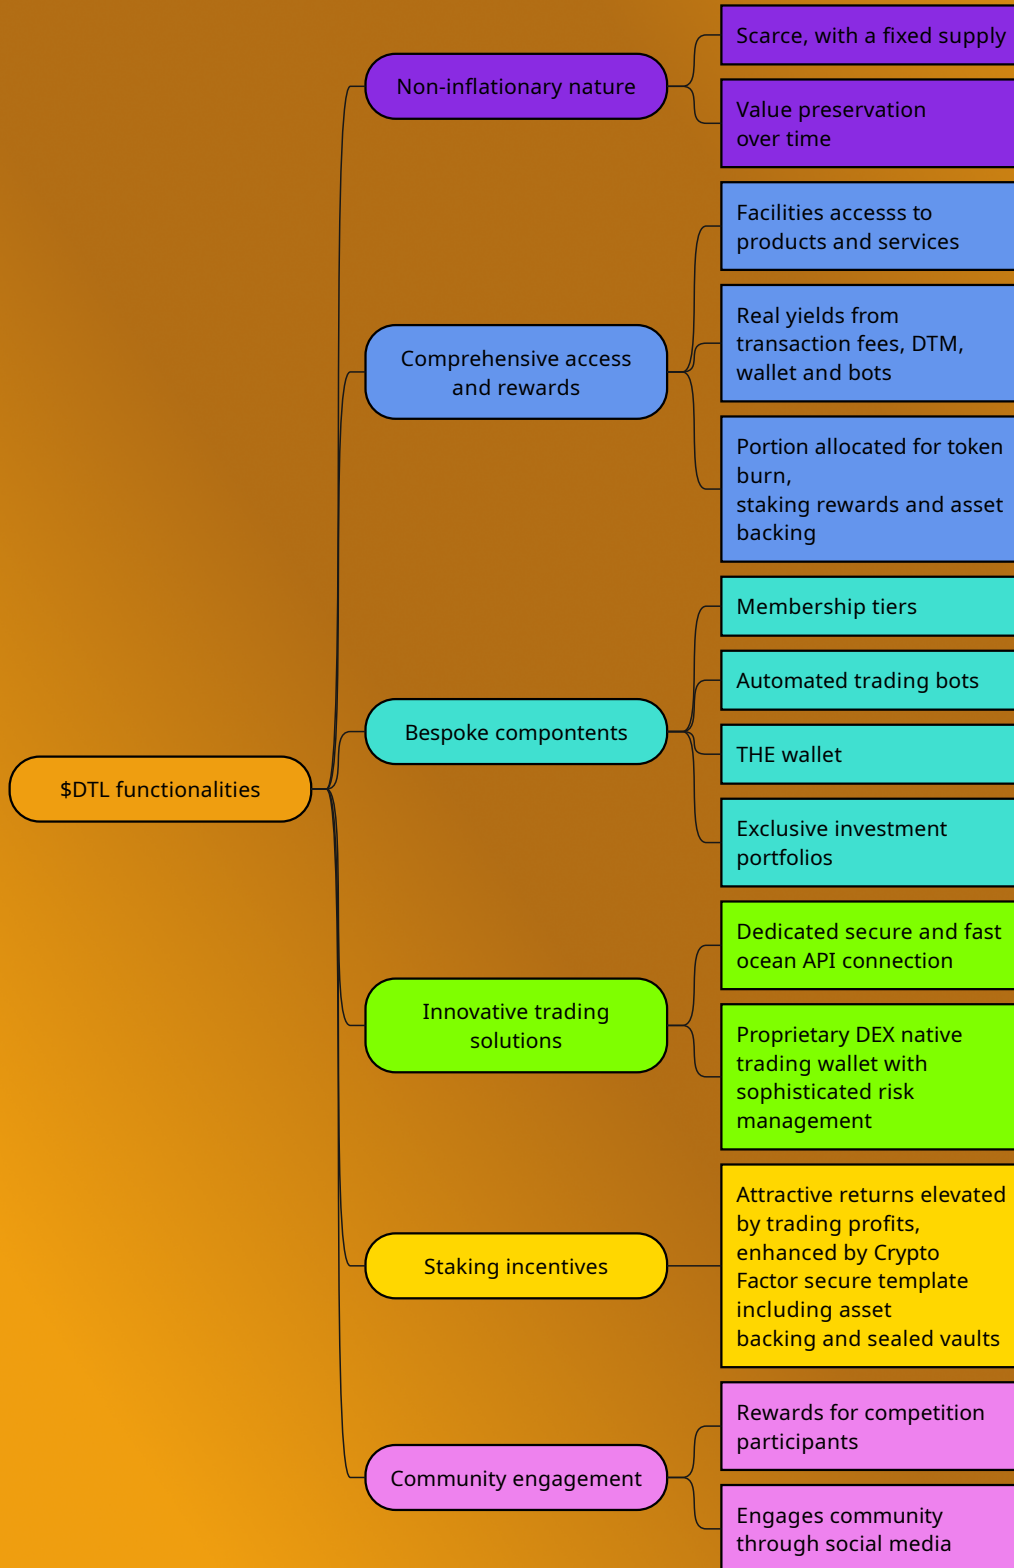

2.8 Community Incentives and Engagements

\$DTL tokens play a crucial role in community engagement through various incentives. They are utilized in core trading activities, DTM competitions, giveaways for newcomers, prizes, and broad social media campaigns, amplifying community participation and loyalty.

2.9 Token Specification

\$DTL is an ERC-20 token on the DefiChain MetaChain (DMC), ensuring robust security and interoperability within the Ethereum ecosystem.

2.10 Token Launch and Timeline

The \$DTL token pre-sale will occur in three stages on June 20th, June 27th, and July 4th, offering interested parties the opportunity to become early investors in the project. In addition to the pre-sale, three airdrop campaigns are scheduled to engage and reward our community:

- Airdrop 1: For our early supporters before the presale.
- Airdrop 2: To reward our early investors.
- Airdrop 3: A big thank you to all our supporters!

The full launch of the \$DTL Privilege Club with all the unique features and a Dex listing on VanillaSwap is scheduled for mid August.

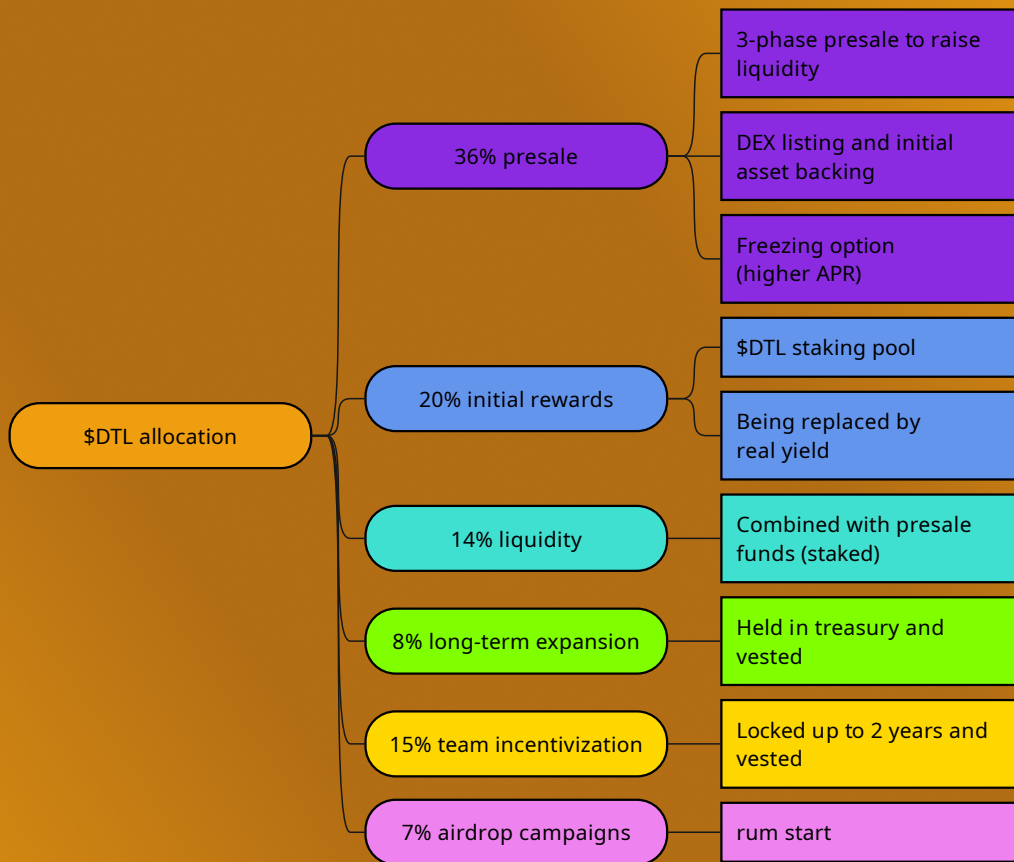

2.11 Distribution

A maximum of 100,000,000 \$DTL tokens will be minted, allocated as follows to ensure maximum value and sustainable ecosystem growth:

- 36% for the 3-phase presale, aimed at raising liquidity for DEX listing (soft-cap) and establishing initial asset backing for price support (hard-cap).
- 20% for providing initial rewards for the \$DTL staking pool, until platform revenue fully supports reward generation.
- 14% for liquidity, in conjunction with presale funds, ensuring a healthy proportion of liquidity to market cap for the DEX listing.
- 8% for long-term expansion of \$DTL, held in the treasury to generate ongoing rewards.
- 15% to incentivize and reward the team, covering overhead costs. This will be managed via a vested treasury with monthly releases after a 6-month lock-up period, spanning the first two years of development.
- 7% for airdrop campaigns, designed to boost presales, incentivize supporters, and reward early investors.

This structured allocation strategy aims to provide a robust foundation for the \$DTL ecosystem, ensuring its strength and sustainability as we move forward.

3 \$DTL Privilege Club

The \$DTL Privilege Club is a premier membership program designed to elevate your trading experience and maximize your investment opportunities on the Defichain DEX. Our program features a tiered membership structure, each offering a range of escalating benefits crafted to support your growth from an emerging investor to a distinguished trader. Each membership tier—from Gold to Diamond—provides increasingly sophisticated advantages, including lower fees, advanced support, and direct access to elite trading portfolios.

Unique to our club, each membership tier will receive a handcrafted, rare NFT that showcases their exclusive status in the \$DTL Privilege Club.

The membership status will be validated live through staking shares.

Our \$DTL staking system encourages longer staking periods by offering attractive multipliers:

- 3 Months: 1.125x multiplier
- 6 Months: 1.25x multiplier
- 12 Months: 1.50x multiplier

By choosing longer staking periods, you not only maximize your rewards but also reduce the initial amount needed to achieve higher membership tiers.

3.1 Tier levels

3.1.1 Gold Tier (from 100,000 \$DTL)

Designed for newcomers embarking on their investment journey with \$DTL, the Gold Tier offers:

- High APR on staking \$DTL.
- Access to our new RENT A BOT and the Dex-native wallet featuring instant transaction execution, multiple transactions per block, limit orders, and auto un-looping (fee applies).
- Reduced enrollment fees for DexTradingMasters (DTM) and access to basic educational workshops.
- Early notifications and opportunities to participate in exclusive social media campaigns and giveaways.
- Dedicated, handcrafted Gold NFT

3.1.2 Platinum Tier (from 300,000 \$DTL)

Building on the benefits of the Gold Tier, the Platinum Tier caters to more seasoned traders seeking deeper engagement:

- Early and discounted access to the Dex-native wallet and Bot service.
- Further reduced fees for DTM and priority booking for premier events and workshops.
- Rent a Bot access to the Core Growth Portfolio, which provides a balanced approach to asset growth with managed risk (Available Q4)
- Dedicated, handcrafted Platinum NFT

3.1.3 Diamond Tier (from 800,000 \$DTL)

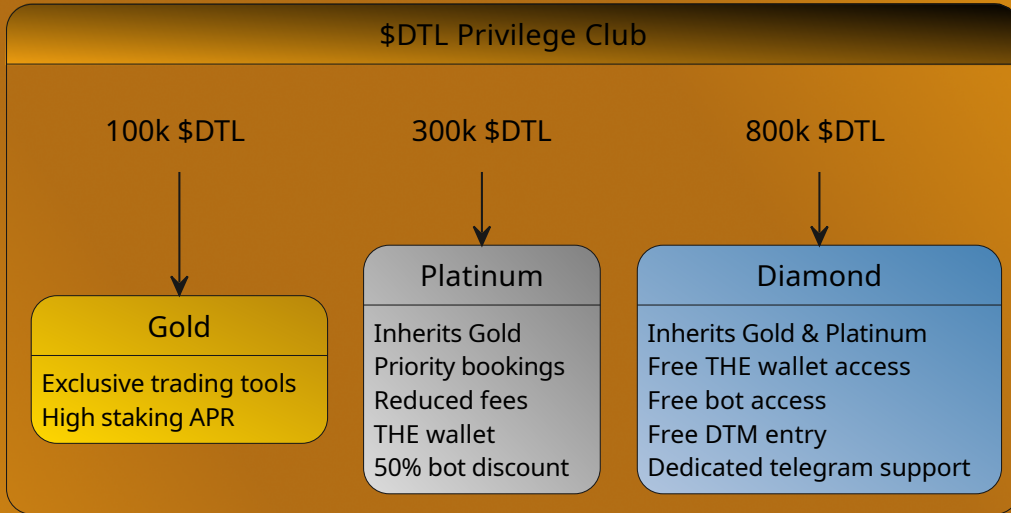

The pinnacle of our membership tiers, the Diamond Tier, is tailored for top-tier investors and offers the most extensive benefits:

- Exclusive access to THE Dex-native Wallet and Rent a Bot service. (1st wallet account & bot free)
- Personal workshop with a professional Dex trader.
- Exclusive Telegram group access for support and advanced trading workshops.
- Elevated recognition within the community and influential input on future \$DTL utility developments.
- Exclusive Telegram group access for support and advanced trading workshops.
- Complimentary registration for DTM and priority access to all community events.
- Dedicated handcrafted Diamond NFT

3.1.4 Summary

The \$DTL Privilege Club not only enhances your trading capabilities but also solidifies your position within the Defichain ecosystem, with each tier designed to reflect the commitment and achievements of its members through unique, tier-specific NFTs.

4 Tokenomics and Revenue

4.1 Tokenomics

As a utility token, DTL is part of the ecosystem focused on supporting the platform as well as providing rewards to holders.

DexTradingLive tokenomics are designed to achieve those goals in the long term while not disturbing the daily transactions of platform users and holders.

Trading the \$DTL Token will come with a 9% symmetrical tax on buys and sells while having 0% tax on any other transfer outside the DEX listing pairs.

The size of the tax can change in the future but can never go above 9% as a measure to protect holders.

At launch, the distribution of the 9% tax has the following composition:

- 2.43% is sent as DTL to the staking pool to generate rewards for holders
- 1.944% is swapped to DFI and sent to the asset-backing contract to increase liquidity and baseline price
- 0.486% is swapped to CFR and sent to the asset-backing contract to increase liquidity and baseline price
- 1.62% is split into DTL and DFI and is sent to the treasury holding the funds for future platform expansion
- 1.62% is split into DTL and DFI and is sent to the treasury holding the funds for team management

- 0.9% is sent as DTL to Crypto Factor as payment for foundational infrastructure service provision

4.2 Platform Revenue

One of the highlights of the DexTradingLive ecosystem is the automated revenue stream from the Platform. All the fees generated from the traders using the platform, the wallet as well as workshops etc. go through the automated funnel where they get distributed.

The distribution of the revenue is as follows:

- 25% is swapped for DTL to the staking pool to generate rewards for holders
- 25% is swapped for DUSD and sent to the asset-backing contract to increase liquidity and baseline price
- 24.5% is sent to the treasury holding the funds for future platform expansion
- 20% is sent to the treasury holding the funds for team management
- 5% is burned
- 0.5% for Crypto Factor distribution service

5 Roadmap

Q2 – DexTradingMasters & Presale:

- The DexTradingMasters DTM7 kicked off on May 13, 2024, marking the anniversary edition. Participants have the opportunity to trial an early version of our Native Dex Trading Wallet.
- Our smart bot Aurum is being tested at the DTM7
- The first airdrop is running from end May to 4th July
- Our presale campaign will commence on 20.6.2024, unfolding in three phases to offer potential investors an early stake in the project.

Q3 – Airdrops and Official Launch:

- We will conduct two more strategic airdrop campaigns to engage and expand our community.
- The official launch of the \$DTL Privilege Club token is scheduled for mid August, marking a significant milestone in our project timeline.

Q4 – Investment Strategies and NFT Rewards:

- The launch of further investment products is planned for Q4.
- Collectible NFTs will be introduced for the DexTradingMasters, designed to reward top traders and offer unique collectibles with specific traits and benefits for traders.

- In the future, the DTL token will be crucial in our planned decentralized autonomous organization (DAO), empowering the community to actively participate in decision-making. Leveraging the governance features of the DTL token, long-term Diamond holders (who will seal their tokens for 12 months) will be able to propose, discuss, and vote on key issues that will shape the future of the DTL ecosystem.

This roadmap outlines our ambitious plans for the coming months, as we aim to enrich our platform and enhance user engagement through innovative strategies and exclusive offerings.

6 Future Plans:

6.1 Investment Strategies

At DexTradingLive, we are dedicated to enhancing your staking rewards through two meticulously designed investment strategies, ensuring both innovation and member satisfaction. These are products for future release:

1. Pro Trader Portfolios (PTP):

Description: Managed by some of the top traders from the #DexTradingMasters, these portfolios are named after the traders themselves, such as Honzan, Hulix, or Voyager portfolios. The pro traders will exclusively make available and fund a trading portfolio under their name for our Bot to follow and generate rewards. These PTPs will be available to Gold, Platinum, and Diamond members.

Availability: Q4 2024 Advantages: Leverage the expertise of top #DexTradingMasters traders, ensuring high potential rewards with professional management.

1. Select Portfolios:

Description: Curated for Platinum and Diamond members, this portfolio will offer a select range of high-performing assets to maximize returns while managing risk effectively.

Availability: Planned for release further down the line. Advantages: Exclusive access to high-performing assets, with a focus on optimizing returns for premium members.

1. Advanced trading bots to optimize trading profits for stakers and traders.

Through these strategies, DexTradingLive aims to provide a robust framework for wealth generation, combining professional expertise with sophisticated technological tools to serve our diverse community.

7 Join Us on Our Journey

As we forge ahead, DexTradingLive invites you to be part of a transformative journey in the decentralized trading space.

Our commitment to innovation, community empowerment, and continuous improvement sets us apart in the bustling DeFi landscape. With the launch of the \$DTL Privilege Club token, we are not just offering a token; we are inviting you into a dynamic ecosystem designed to optimize your trading experience and investment potential.

Our roadmap is clear, our goals are set, and our team is ready. We believe in the power of community and the strength of collaboration. By participating in our upcoming presale, engaging with our airdrops, and exploring our investment strategies, you become more than just a token holder—you become a pivotal part of a community poised to redefine the norms of decentralized trading.

We invite you to join us as we embark on this exciting journey. Together, we will polish the raw diamond of the DEX, enhancing its value and accessibility for all. Invest in \$DTL, and invest in a future where trading is not only profitable but also inclusive, secure, and rewarding.

Let's innovate, stake, and learn together. Welcome to the future of DeFi trading, welcome to DexTradingLive.
